PTS Diagnostics™ Capillary Tubes Consistently Collect Precise Blood Samples¹

PTS Diagnostics Capillary Tube 40µL Sample Volume
Results for all available sizes fall between low and high tolerances

Advanced Technology Innovates Point-of-Care Testing

PTS Diagnostics capillary tubes utilize a single glass tube with plastic casing providing consistent self-wicking technology to preset volumes. This new technology provides better efficiency and is designed to be easier to use and offers significant savings than traditional blood transfer tubes. This improved design is ideal for most small volume blood collection needs.
