DIAGNOSTICS

We work hand-in-hand with our diagnostic and healthcare customers to create the best single-use products to assist in reliable specimen collection and accurate diagnoses.

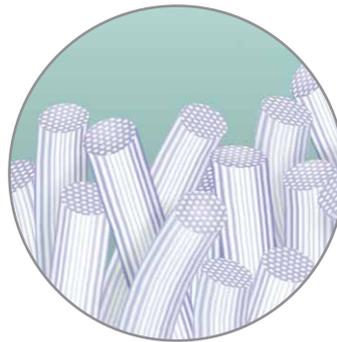

We offer a variety of rayon, calcium alginate, cotton, polyester, and foam-tipped applicators to meet just about any diagnostic need.

For the ultimate in collection and release – so important in diagnostics today – we offer our patented HydraFlock[®] and PurFlock Ultra[®] flocked swabs. Our proprietary manufacturing process produces the finest flocked swabs available, anywhere.

A revolutionary breakthrough in flocked swab technology

Puritan® advances an evolution in diagnostic design.

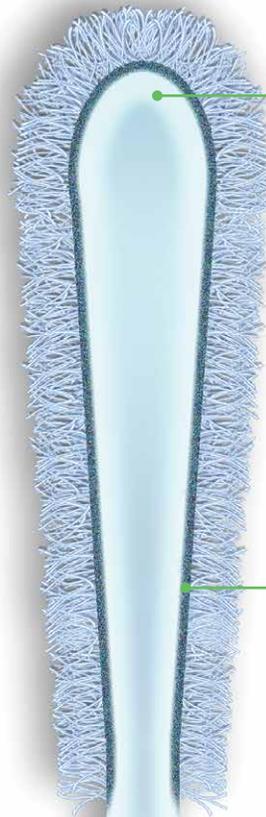

We are constantly striving to provide the most cutting-edge products for our customers. We combined user feedback with a proprietary research manufacturing process to develop our HydraFlock® and PurFlock Ultra® swabs. Incorporating our patented, intricate fiber technology, they provide the highest collection and elution capacities available on the market.

PURFLOCK ULTRA®
Tips are made of flocked polyester fibers which have the ability to better absorb organisms at the site – and maintain viability during transport and elution.

HYDRAFLOCK®
When you need to maximize sample collection and elution, choose our HydraFlock® with its "florete" structure.

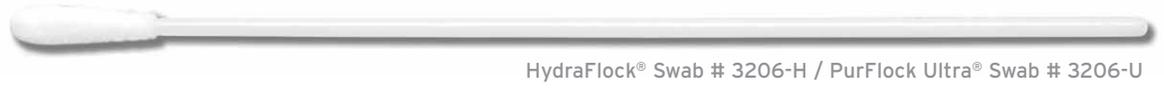

VELVET-LIKE BRUSH TIP
offers optimum sample collection and rapid release into liquid media.

FULLY INTEGRATED FIBERS
Puritan's exclusive, proprietary multi-length flocked fibers are securely adhered to the shaft.

HANDLE WITH PRE-MOLDED BREAKPOINT
to accommodate different processing systems.

Handles have molded breakpoints.

No adhesive residue, or fiber treatments to interfere with collection.

Proprietary flock processing maximizes collection and elution.

HYDRAFLOCK® AND PURFLOCK ULTRA® FLOCKED SWABS (PATENTED)

These patented specimen collection devices produce superior sample collection, rapid elution, and increased test sensitivity by combining a unique microstructure with innovative fibers proven to be more effective than older-style nylon products.

PURITAN PURFLOCK ULTRA®

Engineered for purity and maximal cell yield with a small sample size, PurFlock Ultra® is ideal for PCR, molecular assays, DFA testing, forensic applications, and direct antigen testing. Constructed from fiber technology that results in higher purity than traditional nylon swabs. PurFlock Ultra® swabs provide the greatest balance between purity and sample collection efficiency on the market. PurFlock Ultra® swabs are used in settings where sensitivity of diagnostic testing is key.

PURITAN HYDRAFLOCK®

Specifically engineered for a wide range of biological specimens, HydraFlock®'s unique three-dimensional microstructure design facilitates greater specimen collection and complete elution. These multi-length, split HydraFlock® fibers have a greater absorption surface area than traditional perpendicular nylon flock fibers for more rapid elution and maximal sample preservation. HydraFlock® swabs are ideal for a variety of clinical settings and diagnostic tests.

FOAM-TIPPED APPLICATORS

The applicators are well suited for a variety of clinical and DNA applications. Tips are made of medical-grade foam. Choose from a range of shapes and handle materials.

Extensive range of dry transport systems

More than ever, Puritan® is your one-stop resource.

Our dry transport systems fill out our specimen collection line. Engineered for ease of use and, as are all Puritan products, made in the USA.

MOLDED BASE

An economical choice, this simple design securely holds the swab in place.

TUBE CROSSHATCH

Our BT-style transport systems incorporate a crosshatch feature, to assure a confident grip.

SINGLE SWAB OPTION

Swab handle is held securely in cap. Unbroken label with swab inside assures sterility. Tubes are unwrapped.

DOUBLE SWAB OPTION

For applications calling for a two-swab specimen, each wrapped individually.

FEATURED PRODUCTS:

Details of our dry transport products

DRY TRANSPORT TUBE SYSTEMS

For the collection and transport of specimen when no medium is required. Single and double swab options available along with various handle and tube configurations. Single swabs are sterile and sealed in tube, double swabs are individually wrapped.

Opti-Tranz® & Opti-Tranz® Plus Collection & Transport Systems

The right swab, the right medium for every application.

These collection and transport systems for bacteriological applications are perfect for collection from various specimen sites and easy transport back to the lab.

PRODUCT INTEGRITY
A distinctive label describing product identity, expiry date, patient identification, and collection information.

TIP TYPE & SIZE
Choose from standard or mini rayon tips. HydraFlock® tips are only available in the Opti-Tranz® Plus line.

4 ML AMIES GEL MEDIUM
Available with or without charcoal. Charcoal neutralizes fatty acids that are toxic to microorganisms.

DOUBLE ACTION SECURITY CAP

Prevents samples from leaking or drying out.

PURITAN® EXCLUSIVE

Only product of its kind on the market available with HydraFlock®.

1 ML LIQUID MEDIA

Choose from Liquid Amies or Liquid Stuart absorbed in polyurethane foam sponge.

FEATURED PRODUCTS:

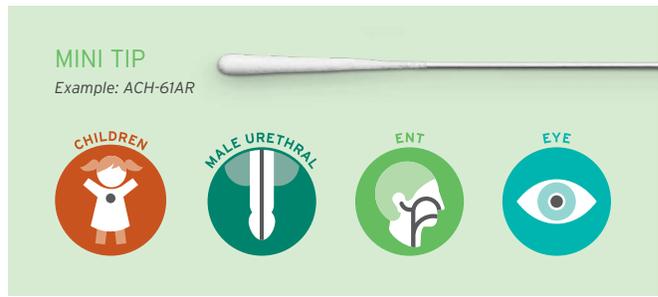

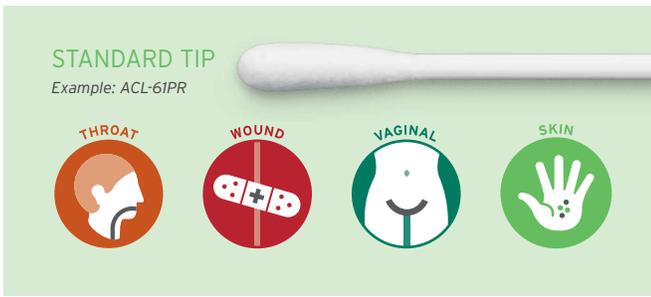

Left: Puritan Opti-Tranz® Amies Gel Collection & Transport System (ACL-61PR)

Right: Puritan Opti-Tranz® Plus Liquid Stuart Collection & Transport System (#LS-62-H)

TIP GUIDE

Available with our standard or mini tips, with flexible or soft aluminum wire handles for smaller, more delicate areas.

PURITAN OPTI-TRANZ® & OPTI-TRANZ® PLUS LIQUID AMIES COLLECTION & TRANSPORT SYSTEMS

Ideal for direct aerobic culture, gram staining and rapid detection tests. All transport systems are individually wrapped.

Opti-Swab®

Combining Liquid Amies and Puritan's proprietary HydraFlock® for an ideal buffered environment for aerobic, anaerobic, and fastidious bacterial samples.

PURE SPECIMEN COLLECTION

No fiber treatment to interfere with specimen purity.

LEAK-PROOF, SELF-CENTERING CAP

Cap is designed to facilitate the capture of the swab handle for specimen processing. Color-coding ensures easy product ID.

SAFE, INTEGRATED TRANSPORT VIAL

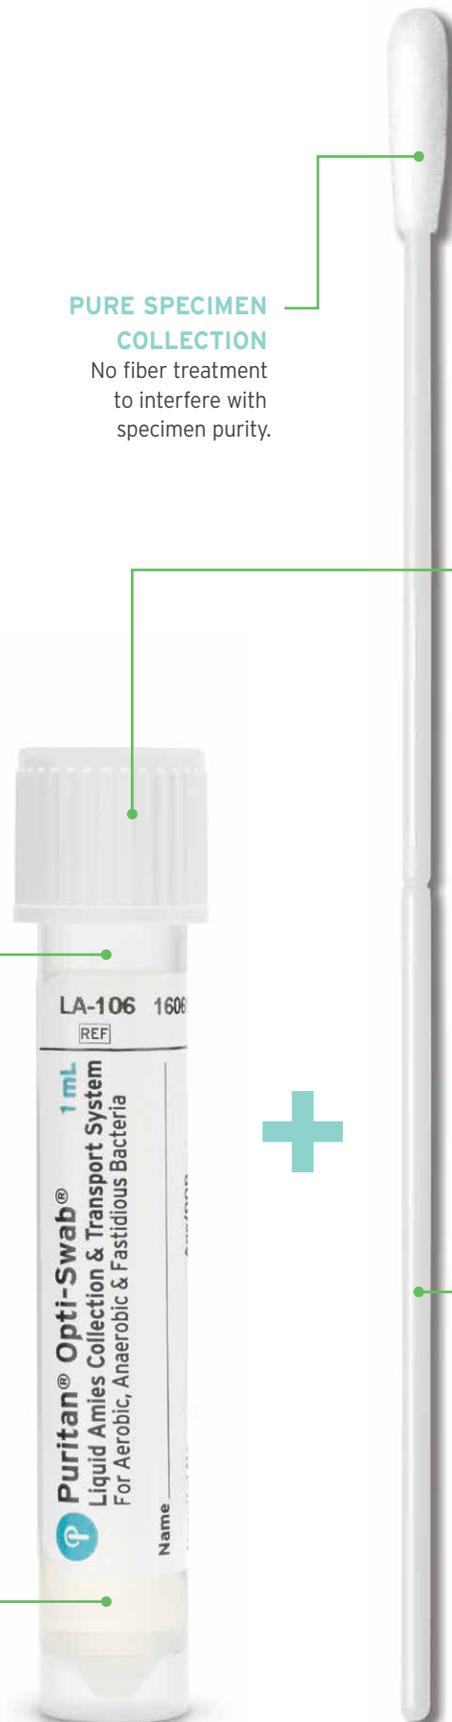

Transport vial is engineered and validated for integrated use with traditional and automated specimen processors. Made with superior raw materials, the vial ensures the safe collection and transport of clinical specimens.

MODIFIED LIQUID AMIES MEDIUM

Maintains viability of aerobic, anaerobic, and fastidious bacteria.

VARIETY OF SWAB STYLES

Patented HydraFlock® swabs are available in several tip shapes and sizes.
