Marijuana(sc)	Negative			50
Propoxyphene	Negative			300
Cocaine(sc)	Negative			300
Ethanol(sc)	Negative			100

Results Finalized by: TS

The screening test is a laboratory developed test (LDT) performed by abbreviated liquid chromatography tandem mass spectrometry (LC-MS/MS). The confirmatory test is a LDT performed by LC-MS/MS. These LDTs have not been cleared or approved by the FDA. LDTs are not required to be cleared by FDA. Physicians should use discretion when interpreting analytical results for samples with failed validity testing.

Sample Report

CLIAwaived Pricing

\$2,495 for the LIS set up, configuration and training
Monthly SAAS of \$99 which covers support, hosting and software enhancements

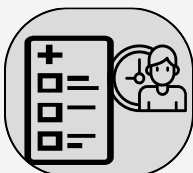

Features

- Enter and store patient demographics which stores historical testing data
- Enter in lab results while attaching image of the cup
- CLIA certified Lab Report with cup image on report
- Barcode Labeling for specimen identification
- Lab Requisitions with signatures
- Chain of Custody for sample tracking

Cloud Technology

Web Browser login
No hardware with all maintenance and backups provided
Layered security with user based permissions

Integration with EMR/CRM systems

Data interfaces available at an extra cost to export lab reports to EMR's and third party CRM systems
