

Who should you be screening for syphilis?

Routine screening for syphilis is the most effective way to diagnose the infection in the early stages, when it's easiest to cure.

The CDC recommends routine screening for the following people:²

**Anyone
who is
pregnant**

**Sexually
active
MSM**

**Sexually
active
HIV-positive
individuals**

**Partners of
recently
diagnosed
persons**

**Individuals
taking PrEP**

**Anyone
showing
symptoms**

**Discuss risk
factors with
all sexually active
individuals**
