

# CLIAwaived,™ Inc. PREGNANCY TESTS

The CLIAwaived,™ Inc. pregnancy tests are qualitative immunoassays for the detection of human chorionic gonadotropin (hCG) in human urine for the early detection of pregnancy. HCG is a hormone produced by the placenta, which, in normal subjects, provides an early indication of pregnancy. Early testing and detection of hCG is vital for the health of the mother and child, and to deliver reliable diagnostic information on which health care professionals can base optimal patient management strategies.

- Simple, accurate, one-step testing
- Built-in procedural control
- Results in 5 minutes or less

The CLIAwaived,™ Inc. pregnancy tests are available in urine (dip-strip), combo (dip-strip or cassette) or pregnancy urine (cassette) testing formats.

Product Description	Type	FDA	CLIA	CE	Packaging	Catalog #
CLIAwaived,™ Inc. Pregnancy Urine Test	Dip-strip	■	■	■	50 tests	CLIA-02-2471
CLIAwaived,™ Inc. Pregnancy Combo Test*	Dip-strip	■		■	50 tests	CLIA-02-2427

# PREGNANCY TESTS

The **CLIAwaived,™ Inc. Pregnancy Urine Test (Dip-Strip)** is a qualitative immunoassay for the detection of human chorionic gonadotropin (hCG) in human urine for the early detection of pregnancy.

The **CLIAwaived,™ Inc. Pregnancy Combo Test (Dip-Strip)** is a qualitative immunoassay for the hCG in human urine or serum for the early detection of pregnancy.

Both tests are for health-care professional use only and not for self-testing.

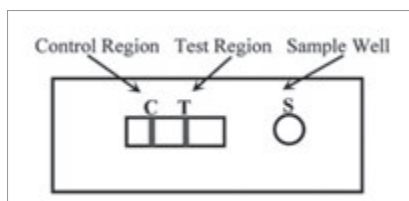

1. Refrigerated specimens and other test materials including device, must be equilibrated to room temperature before testing.
2. Remove the test device from the container or pouch, whichever applies. Label the test and sample container (not provided), accordingly.
3. Holding the test device vertically from the handle end, dip the sample pad in the specimen for about 10 seconds. Keep the sample surface at the level indicated by the arrow sign on the test.
4. Remove the test from specimen, place it on a flat, dry surface.
5. Strong positive results may be observed in 2-3 minutes. Weak positive results may take a longer time, up to 5 minutes, to develop.

The **CLIAwaived,™ Inc. Pregnancy Urine Test (Cassette)** is a qualitative immunoassay for the detection of human chorionic gonadotropin (hCG) in human urine for the early detection of pregnancy.

The **CLIAwaived,™ Inc. Pregnancy Combo Test (Cassette)** is a qualitative immunoassay for the hCG in human urine or serum for the early detection of pregnancy.

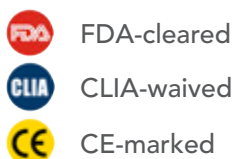

Both tests are for health-care professional use only and not for self-testing.

1. Refrigerated specimens and other test materials including devices, must be equilibrated to room temperature before testing.
2. Remove the test device from its pouch and place it on a flat surface.
3. Holding the dropper vertically, add four drops of the specimen to the sample well.
4. Strong positive results may be observed in 2-3 minutes. Weak positive results may take longer time, up to 5 minutes to develop.
